

Formula 67 - Detailed UML class diagram

Page 1: domain classes, persistent objects, and major runtime relationships

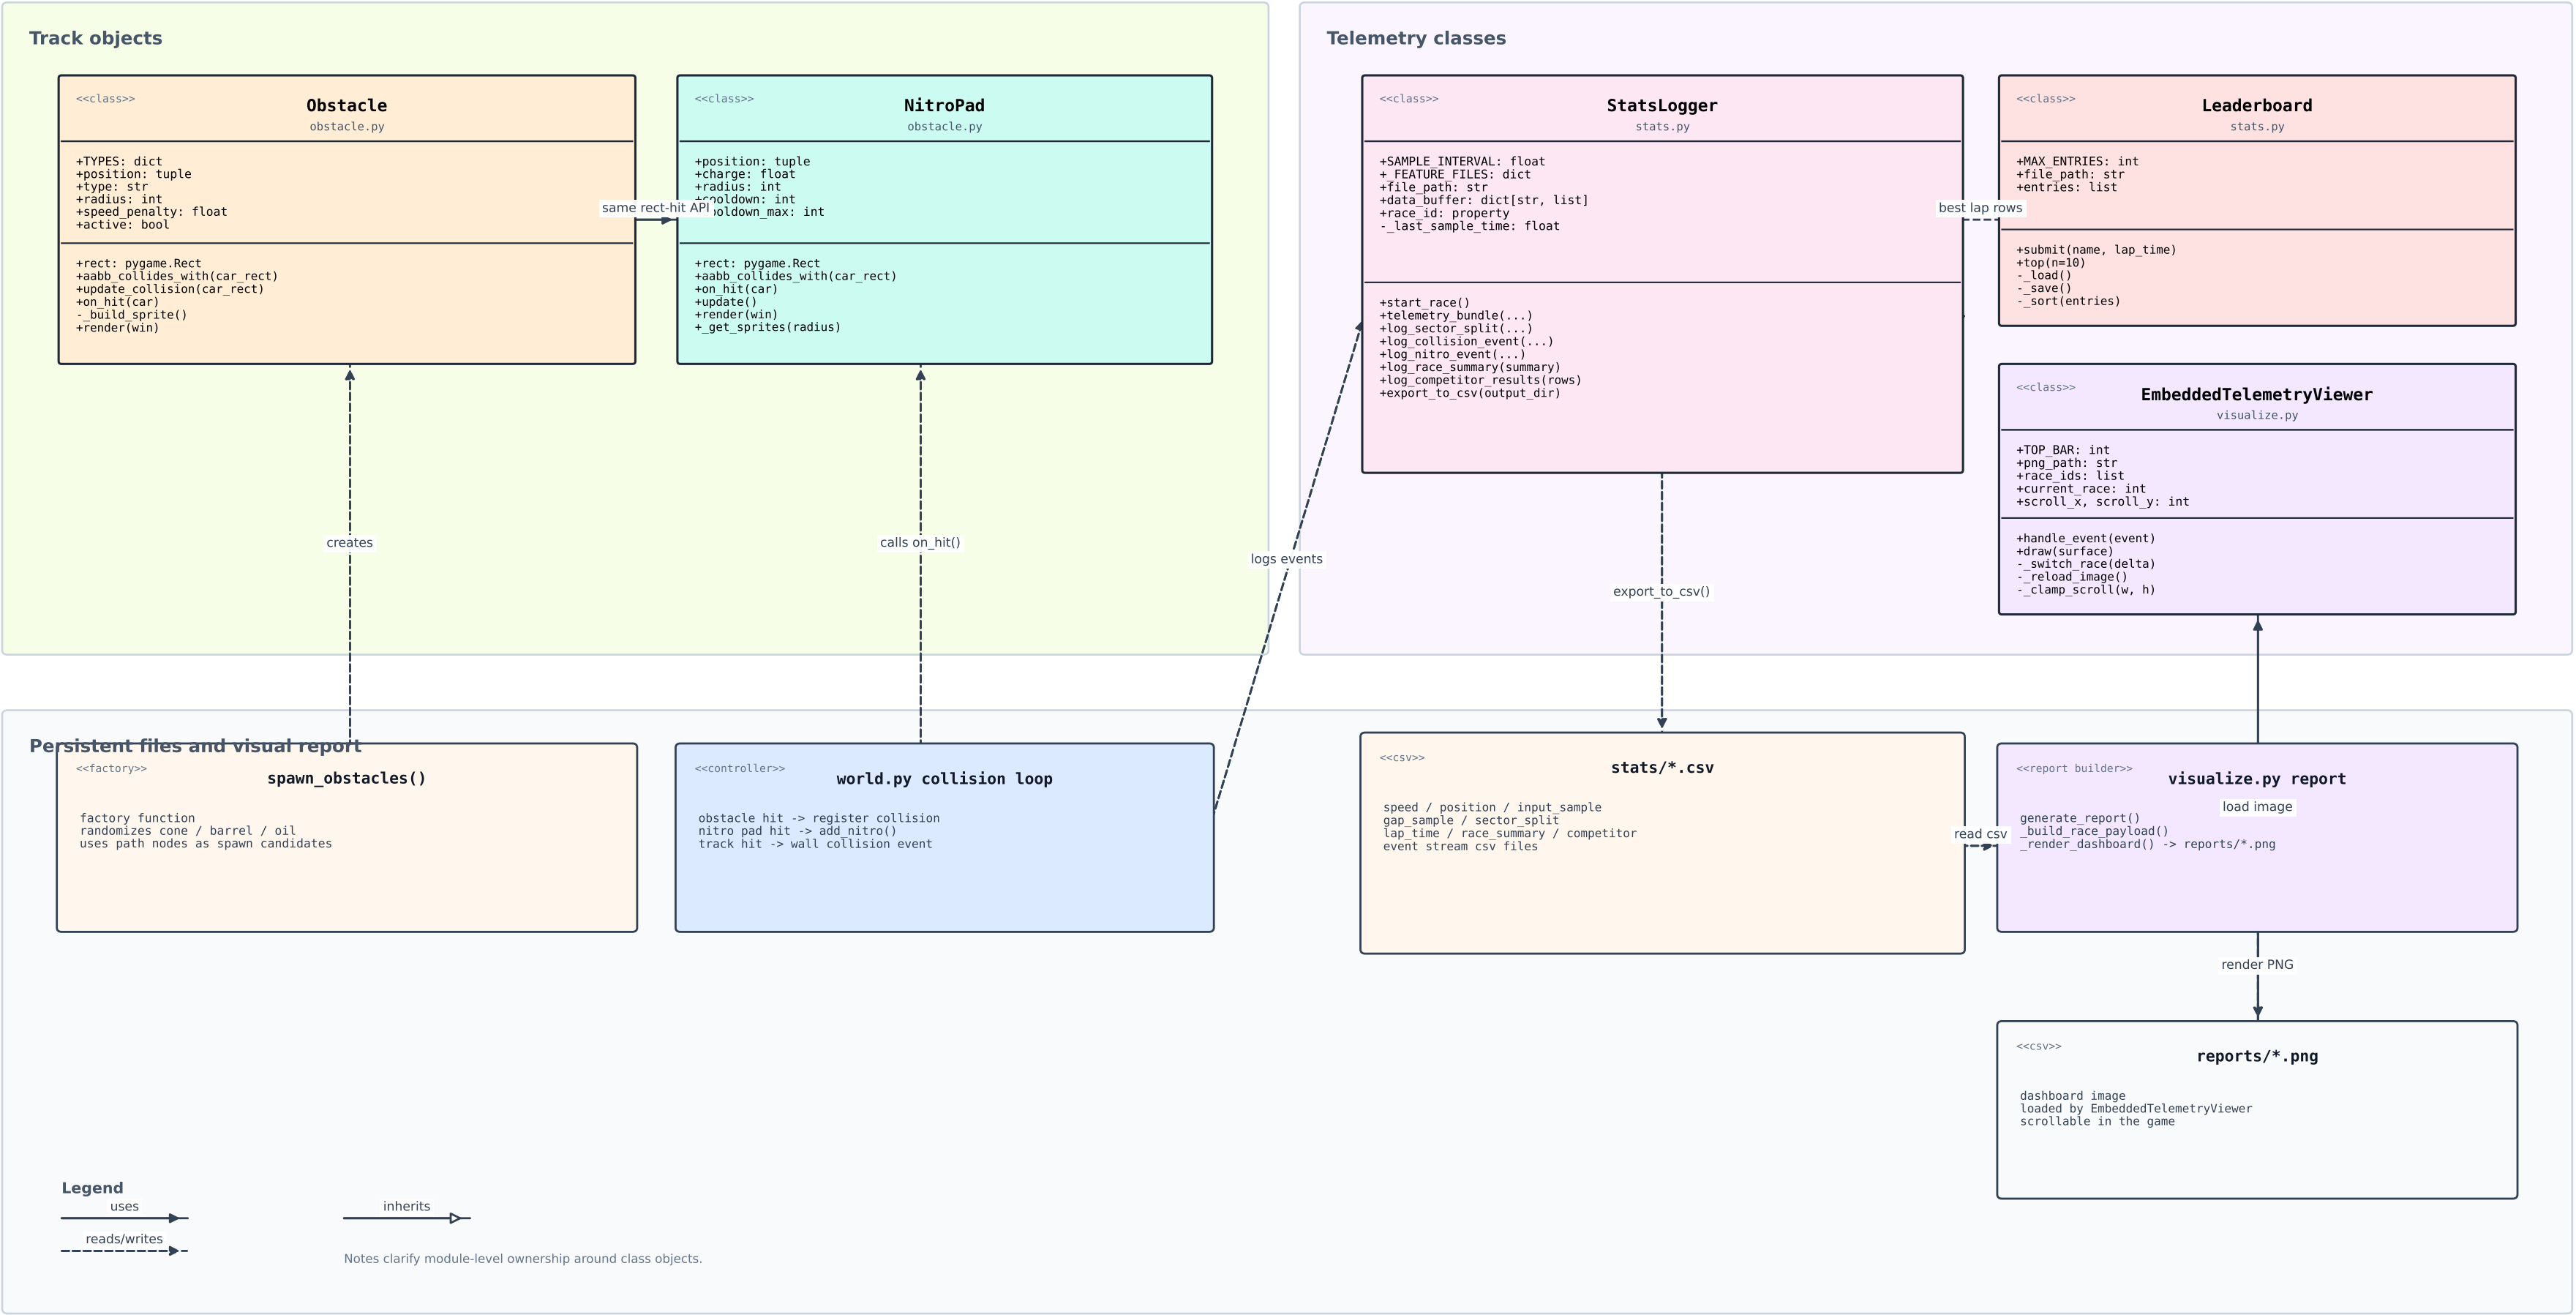

Formula 67 - Vehicle and race class detail

Page 2: expanded class members with larger boxes and no text stacking

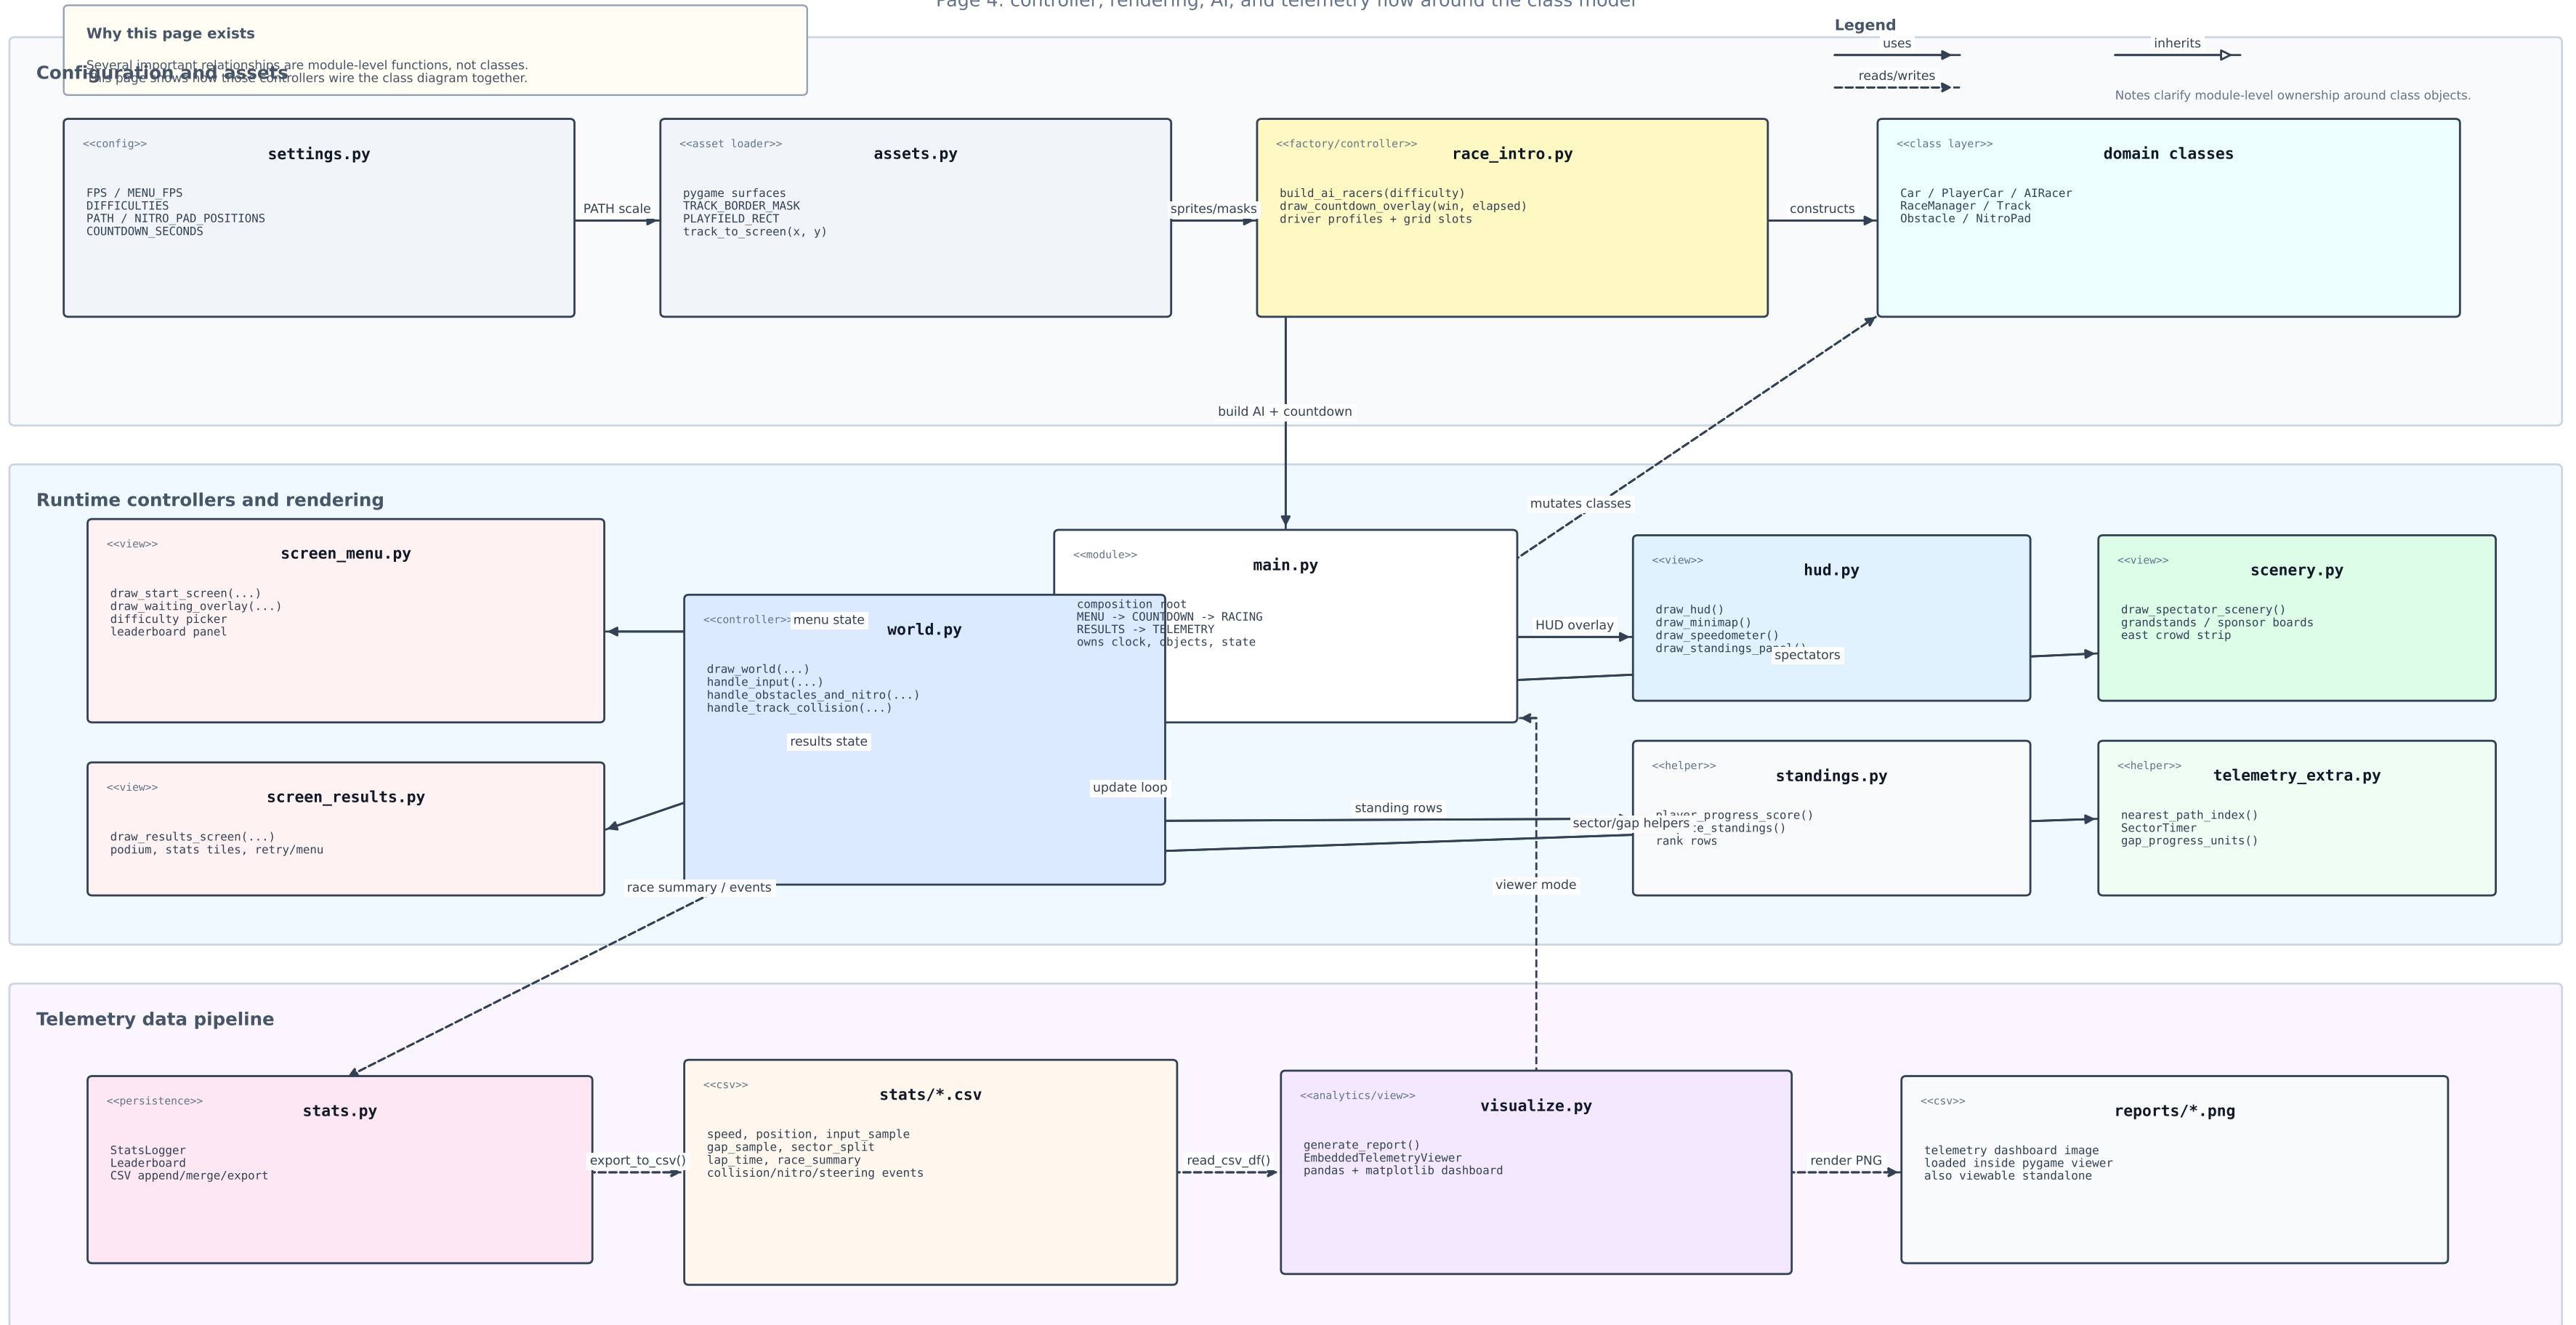

Formula 67 - World and telemetry class detail

Page 3: hazards, pickups, persistence, leaderboard, and report viewer

Formula 67 - Runtime module dependency map

Page 4: controller, rendering, AI, and telemetry flow around the class model

Formula 67 - Telemetry class and data detail

Page 5: CSV feature groups, report builder, viewer interaction, and leaderboard persistence
